### About ShapeUp Add-in for ArcGIS Pro

The ShapeUp Add-In for ArcGIS Pro is an add-in utility for the ESRI ArcGIS Pro software. It allows you to select and copy shapes from within ArcGIS into SMART for any Plan Property Boundary, Stand, Line, or Point. You can copy the geometry of a shape from any vector layer already in use on your local system (e.g. shapefile, coverage, SDE, GDB, pGDB), thus saving you data-preparation time.

If you have any difficulty installing or using the ShapeUp tool, please notify the SMART Help Desk:

- 303-275-5341
- [support@formap.kayako.com](mailto:support@formap.kayako.com)

**Step 1:** *If you do not already have a copy of the Add-In, log into SMART using your USDA eAuthentication account. Follow steps 2-4. If you already have the file, begin at Step 5.*

**Step 2:** On the bottom of your HOME page, click the [Download supporting software](#) link.

# SMART

## Stewardship Mapping and Reporting Tool

**Step 3:** Click the [Get the ShapeUp Add-In](#) button.

**SMART Desktop**

The SMART Desktop program is intended for foresters that do not have a reliable enough internet connection to use SMART Web. SMART Desktop allows you to create stewardship plans and upload the Plan data to SMART Web when you have a sufficient internet connection. Please note that all active Stewardship Plans must be uploaded from Desktop to Web for federal reporting requirements.

[Get SMART Desktop](#)

**ShapeUp**

Use ShapeUp to visualize your Shapefile files and copy them into SMART for any mapped object.

[Get ShapeUp](#)

**SADL Tool**

The Stewardship Accomplishment Data Loader (SADL) tool allows State Administrators to upload multiple stewardship plans in Shapefile format, with minimum required attribution. This should be used for Forest Stewardship Plans not uploaded by other means.

**ShapeUp Add-In for ArcMap**

The ShapeUp Add-In for ArcMap is an add-in tool for the ESRI ArcGIS for Desktop software, and will allow you to select and copy shapes from within ArcGIS into SMART for any mapped object.

[Get the ShapeUp Add-In](#)

**Step 3:** Click "Get the ShapeUp Add-In"

**Step 4:** Download File to your Desktop

**Step 4:** The zip file downloads to your desktop computer.

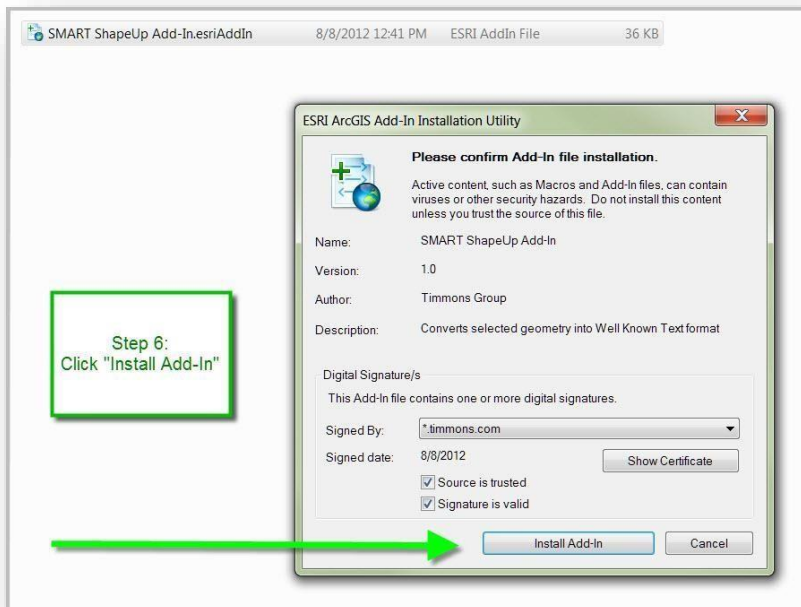

**Step 5:** After the download has completed, unzip the folder, and double-click [ShapeUp Add-In.esriAddInX](#).

**Step 6:** Click the [Install Add-in](#) button and wait for installation to finish.

# SMART

## Stewardship Mapping and Reporting Tool

**Step 7:** Open ArcGIS Pro on your computer.

# SMART

Stewardship Mapping and Reporting Tool

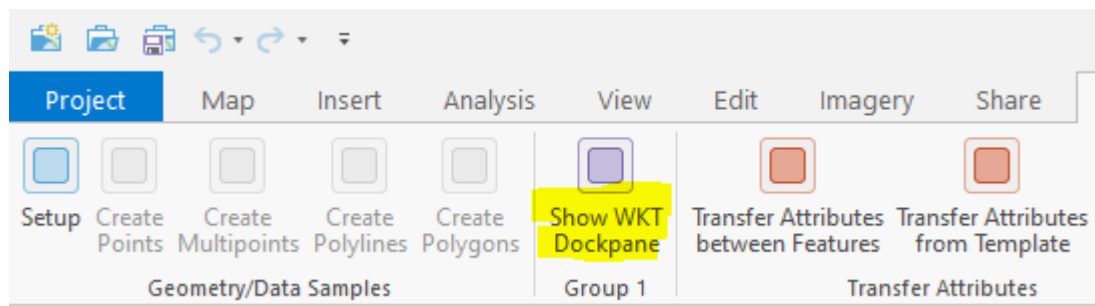

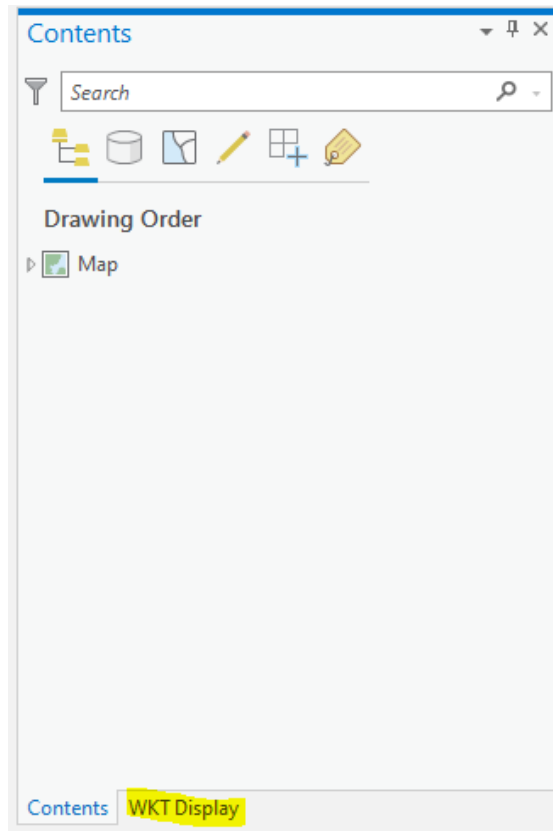

**Step 8:** On the ArcGIS Pro menu bar:

- If you can already see a tab named “WKT Display” on the Contents window then proceed to the next step.
- Click [Add-In](#), then [Show WKT Dockpane](#).

# SMART

Stewardship Mapping and Reporting Tool

**Step 9:** Using your preferred method, add a vector layer to your ArcGIS Pro Table of Contents.

Click the **Select Features** icon.

- Select a Point, Line or Polygon to copy into SMART. The selected area will highlight.
- A dockable window (WKT Display) should already be open to display the coordinates of the selected shape(s).

# SMART

## Stewardship Mapping and Reporting Tool

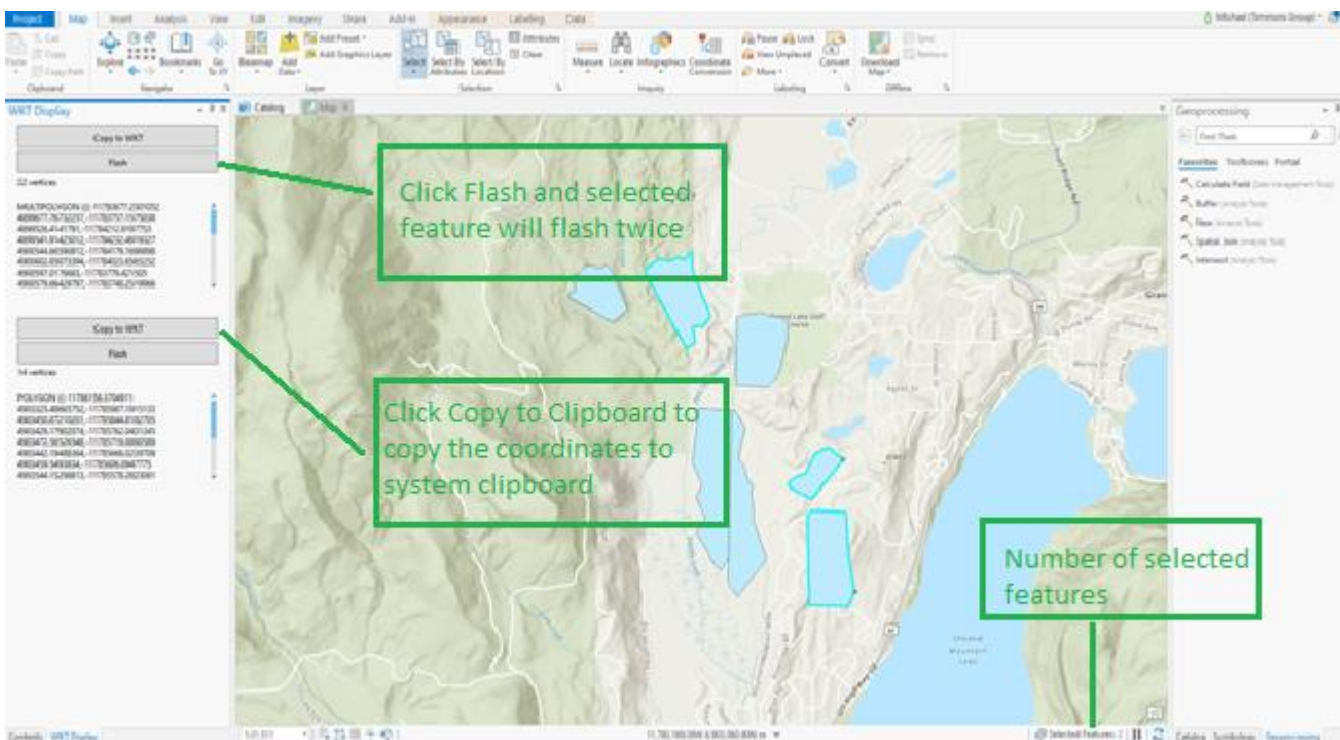

### Step 10: Copying coordinates of a single shape.

If you have selected more than one shape, a specific geometry will flash by clicking the **Flash** button. You can also keep selecting geometry and the window will update accordingly.

- Click **Copy to Clipboard**. This copies the coordinates of a single shape to system clipboard.

**\*Note:** Multi-part polygons are supported by the tool. If the shapes are listed as separate records in the attribute table, they will need to be merged as a multi-part polygon before use in ShapeUp.

### Step 11: In the SMART application:

Click **Upload**.

- In the textbox, right-click to **Paste Clipboard** coordinates in window. \*Only input the coordinates of one shape. Click **Add Shape**.

General Information Details **Property Boundary**

**Confirm Upload Shape**

**Use ShapeUp**

1. Start the ShapeUp tool on your computer
2. Add a Shapefile to the Map (instructions are in ShapeUp)
3. Click on the desired shape in the map
4. Click Copy
5. Switch to SMART and return to this Upload page
6. Right-click in the window below and select Paste
7. Click Add Shape button
8. Enter a Name and click Save

Paste one shape below

```

```

**About this upload field:**

- **Upload uses WKT coordinates.** If you have a shape in WKT coordinates, you can paste it here.
- Alternatively, the SMART ShapeUp Tool allows you to copy a shape from a shapetile and paste it (as WKT coordinates) into SMART Web or SMART Desktop.
- Shapes can be pasted into any 'In Progress' Stewardship Plan in SMART, and used for a Property Boundary, Stand, Line, or Point.
- **Only one shape can be pasted at a time;** single-record multi-part shapes are allowed.
- Stand, Line, and Point shapes can only be added if the Property Boundary has been mapped.

**How do I get my data into WKT format?**
